

JMJ2ASHDEM

SPECIFICATION

Construction	Bolt-on Neck	Body	Ash
Neck	Maple U-Shape	Fingerboard	Maple
Scale	34" (864mm)	Frets	24F Medium Jumbo C.F.S.
Tuners	GOTOH® GB11W	Bridge	FGN FGBB-104 (String Pitch = 19mm)
Tailpiece	-	Hardware Color	Black
Pickup (Neck)	EMG® J	Pickup (Middle)	-
Pickup (Bridge)	EMG® MM-TW	Controls	2Volume, 1Tone w/ Push-Pull SW (Mode Select)
Body Finish	Open Pore Matte	Strings	D'Addario EXL165 (.045-.105)
Others	-	Accessories	Original Gig Bag
Color	OPB (Open Pore Black)		

FEATURES

Circle Fretting System (C.F.S.)

All FGN guitars and basses come with a unique Circle Fretting System (C.F.S.). It was created by FGN based on an idea to offer better pitch and articulation than conventional guitars and basses. All frets are installed on fingerboard in slightly curved shape, so that every string crosses all the frets in 90 degrees, i.e. to offer a minimum contact of string on a fret, and it makes the scale length of every string even while it actually varies on conventional fretting. The C.F.S. is a solution of fretting on a traditional guitar and bass and it offers clearer articulation and tones which give dimension when you play a cord and also cut through the mix when you play single notes.

JMJ maple neck with a heel adjustable truss rod for superior stability.

Black finish GOTOH tuners on matching color headstock.

Newly designed neck heel aiming for subtly larger neck pocket than the old model yet maintaining comfortable high frets access. It results in more low-mid and punch.

Sturdy FGBB bridge offers power and stability transmitting string vibration straight into body. It offers 2-way stringing options.

Combination of EMG J & MM TW pickups with Mode Select switch offers a tonal variety. Powerful but very low noise.
